Svar på forespørgsel 130/2019

Kære Camile

Du har spurgt De Videnskabsetiske Komitéer for Region Midtjylland om nedenfor beskrevne projekt skal anmeldes til komitéen.

Komitéen finder efter en konkret vurdering, at projektet ikke kan betragtes som et sundhedsvidenskabeligt forskningsprojekt, jf. definitionen i komitéloven § 2, nr. 1, og projektet skal derfor ikke anmeldes til komitéen, jf. samme lov § 14, stk. 1.

Den omtalte lov er lovbekendtgørelse nr. 1083 af 15. september 2017 om bekendtgørelse af lov om videnskabsetisk behandling af sundhedsvidenskabelige forskningsprojekter.

Med venlig hilsen

Annette Engsig

Emne: Inquiry about exemption - memory task

Dears,

I write to you regarding whether the following project should be notified to MIDT, or is exempted.

Me and my advisor, Micah Allen (cc), are submitting a project to investigate metacognition in healthy human subjects.

Participants will answer questionnaires and perform computer-based cognitive tasks (memory for neutral and arousing words) while also rating their confidence in their decisions. In parallel, we will measure their heart rate (ECG), a non-invasive, painless technique.

Here I send the detailed project, also sent to the Behavioral Project Initiation group, from Aarhus University, with methods specification, for your consideration.

I am available to give any further information about it.

Thank you very much,

Camile Correa
Postdoc - CFIN AU

Dear Annette,
Thank you very much for your reply.
Best regards,
Camile.
